# Optimum Lighting

## Leaders in the Development of Energy Efficient Fluorescent Lighting Alternatives

### The Brightest Energy Solution

Optimum Lighting is committed to developing new lighting products using the latest technology advancements. Our focus on the "Engineered Solution" fuels the growth and continuous expansion of our product line. Optimum Lighting remains the innovative leader in High Lumen Fluorescent Energy Efficient Lighting Fixtures. Truly insightful and creative design solutions for all applications keeps us ahead of the marketplace.

Our products can save **40%**, **50%** or even **60%** on your energy expenditures. Made in the USA and an Original Equipment Manufacturer, Optimum Lighting provides solutions for: Industrial, Commercial, Retail, Office, Manufacturing and Warehousing. Additionally, Optimum specializes in design solutions for municipal sites such as: gyms, pools and recreational facilities.

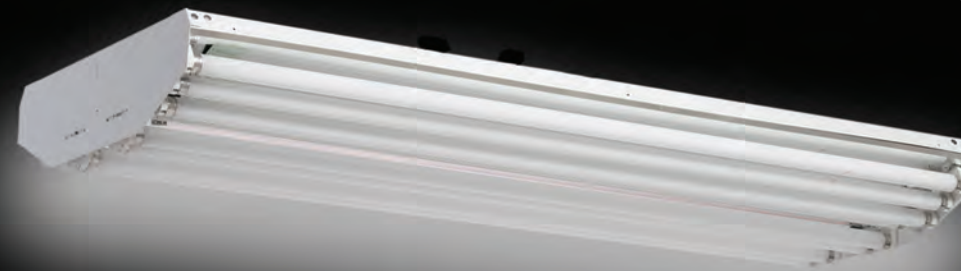

### Our Culture

Pick from our ever expanding fixture catalogue of product offerings (many patented), or call for personalized attention and we'll create a custom fixture design solution. We thrive on all lighting challenges. Our factory can build your fixtures with: whips, sensors, lighting controls, or specialized switching... Just ask us!

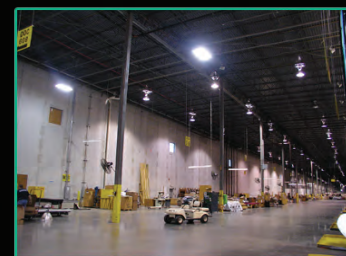

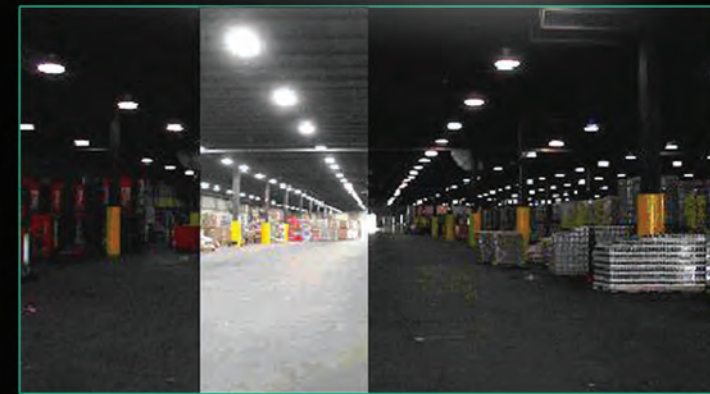

### What's Your Motivation?

Lighting Upgrade projects can help meet facility goals. While energy saving opportunities are typically the highest priority, additional focus factors may be: new light level requirements, CO2 emission reductions, removal of outdated technology including T12 products, reducing maintenance costs, improving employee productivity and/or creating a safe work environment. New Technology also offers: better lighting quality, more light output, longer life products and new product warranties.

### Enhance Your Facility

You be the judge! These photos highlight projects in various stages of completion. Viewing retrofit projects mid-installation clearly offers unique insight into the potential enhancement for your facility environment.

Before

After

Before / Existing  
400w MH  
(455 watts)

After / Proposed  
6 Lamp T8  
(218 watts)

**\* Retrofit and Save Money**  
**\$154.05**

## Optimum Lighting Offers Fixture Solutions For Every Application

Change to New Fluorescent Lighting Technology and add up your savings! This fixture upgrade provides Annual Energy Savings of **\*\$154.05** per fixture, per year. Not included are savings from: hvac, sensoring, rebates, maintenance avoidances and the list goes on.

\* Based on .10 kwh and 6500 hours of operation per year

# The “Optimum Solution” from Start to Finish

Presentations and the education process are vital to a successful retrofit project. Web Based Seminars and training classes can be arranged for your team. We support our ESCO and Distribution channel partners with many beneficial support services.

Our experts get to know your facility. It all starts with lighting designs. Working to exceed your expectations yields top notch energy saving solutions. Optimum can take your existing facility plans and provide a detailed lighting evaluation including light level projections. Whether your project is new construction or a retrofit, we engineer solutions to meet your energy and cost reduction goals.

Optimum Lighting and our partners throughout North America join forces to manage our customer’s vision of their lighting needs. From start to finish, Optimum can assist with all support functions.

**MADE IN**

**THE USA**

We believe in quality, consistency and producing Energy Efficient Lighting Products to the highest standards. As a company that proudly displays the “Made in the USA” logo, we service all of North America and can guarantee you will receive products that meet your design requirements and exceed your expectations!
